DESIGNING NARRATIVES:

Unveiling Our Journey With Design Principles

At the heart of our laminate creation process lies a deep understanding of the principles of design. These principles serve as our guiding light, shaping every aspect of our laminate production to ensure uniqueness and functionality in interior spaces.

From balancing colors and textures to creating harmonious patterns and proportions, we meticulously integrate these principles into each design. By embracing contrast, emphasis, rhythm, and unity, we craft laminates that not only stand out but also seamlessly blend into any interior aesthetic.

Our commitment to these principles ensures that every Dorby laminate is not just a surface but a carefully curated piece of art, elevating spaces with both style and purpose. With design at our core, we strive to create laminates that inspire creativity and enhance the beauty of every interior they adorn.

Surface Matters 04 comprises of layers of specially selected paper, impregnated with melamine and phenolic resins pressed and hardened under heat and pressure. The process ensures strong bonding, resistance to boiling water and chemical, and increases dimensional stability. Surface protection through special treatment renders all Surface Matters 04 products. It is suitable for a wide range of applications such as wall lining, column claddings, doors, shelves, tabletops, worktops, counters, vanity units, cubicles, lift linings, store fittings, displays, check out desks etc.

Cutting a laminate sheet at an angle of 90° leads to development of cracks in corner after pasting. Therefore, it is advisable to avoid cutting at an angle of 90°. Bonding of laminate under high humidity, plywood with high moisture content, and uneven surfaces, inferior quality adhesive and insufficient pressure may lead to delamination/ air bubbles in between ply and laminates.
